

Installation Instructions for Big Daddy Utility Holder

Included Hardware

- Utility Holder (1)
- Screws (4)
- Wall Anchors (4)

Tools Needed (Not Supplied)

- Level
- Pen, Pencil, or Sharp Object
- Drill (with appropriate bit size for wall anchors)
- Phillips Screwdriver or Drill Driver
- Hammer

1. Prepare Your Workspace: Lay out all included hardware and tools on a flat surface to ensure everything is organized and accessible.

2. Align the Utility Holder: Use a level to ensure the Utility Holder is horizontally aligned on your desired wall location.

3. Mark the Mounting Holes: Use a pen, pencil, or sharp object to mark the locations of the four mounting holes through the Utility Holder.

4. Expand the Marks: Carefully expand the marked holes using a screwdriver or similar tool to ensure the wall anchors fit properly.

5. Insert Wall Anchors: Gently hammer the provided wall anchors into each hole until they are flush with the wall.

6. Secure the First Screw: Pre-drill the first screw to ensure the Utility Holder is correctly positioned and securely anchored.

7. Install Remaining Screws: Repeat the process for the remaining three screws, tightening each one to secure the Utility Holder firmly in place.

Your Utility Holder is now ready for use!
